

/projects/mti/ohCaptain
/ohCaptain/include/Core
/Exception.h

```
graph TD; A["/projects/mti/ohCaptain  
/ohCaptain/include/Core  
/Exception.h"] --> B[iostream]; A --> C[exception]; A --> D[string];
```

The diagram illustrates a header file's dependencies. A central box at the top contains the file path: /projects/mti/ohCaptain, /ohCaptain/include/Core, and /Exception.h. Three blue arrows originate from the bottom of this box and point to three separate boxes below it, labeled 'iostream', 'exception', and 'string'.
